

# Streamline Test Development and Execution with Automation

## Solution Overview

The increasing complexity of networks, coupled with shorter release cycles, places enormous pressure on quality assurance. Manual testing is error-prone and time-consuming, leading to missed defects and delayed product launches. CNTL Automate is part of APNT's CNTL (Composable Network Test Labs) solution suite that also include CNTL Connect and CNTL Manage. CNTL Automate transforms your testing approach with robust automation tools. It empowers you to develop comprehensive test suites, execute them consistently, and rapidly analyze results – ensuring the quality and reliability of your network products.

"We went from having no automation to 65% of test cases being automated in the first year enabling us to reduce our time between releases by 1000%"  
- Network Equipment Manufacture

## Accelerate Testing with Context-Aware Development

CNTL Automate empowers you to streamline network test automation. Its core component, Spirent Velocity iTest, provides a powerful IDE (Interactive Development Environment) that seamlessly integrates with Spirent Velocity LaaS. This enables a context-aware development environment for network testing. You can create test cases that directly leverage the devices, topologies, and configurations provisioned within Velocity LaaS. This dynamic integration eliminates the gap between test development and execution, enhancing testing speed, accuracy, and collaboration.

**Python IDE for Non Developers**  
Intuitive IDE enables easy and rapid creation of test automation in Python.

**Context-Aware Capture-Replay**  
Capture and replay manual test steps with context awareness of dynamic test environment parameters.

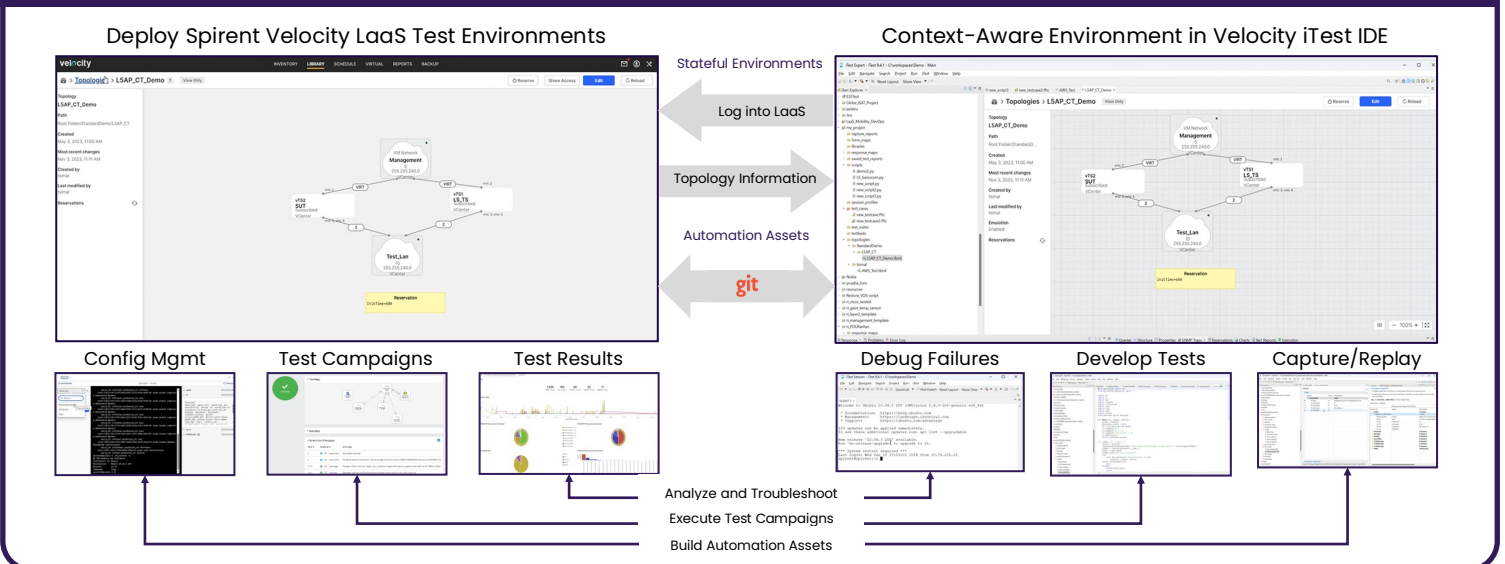

**Robust Execution and Analysis**  
Execute test campaigns, customize reports with in-depth failure analysis.

## CNTL Automate Solution

### Integrated Solution Features by Spirent Velocity iTest and Velocity LaaS

# Streamline Test Development with a Context-Aware IDE

Discover the power of Spirent Velocity iTest, the heart of CNTL Automate. This intuitive IDE streamlines network test automation with Python-based scripting, real-time lab interaction, and seamless capture/replay composed in the context of the test environment.

## Non-Programmers Get A Jumpstart On Python Automation

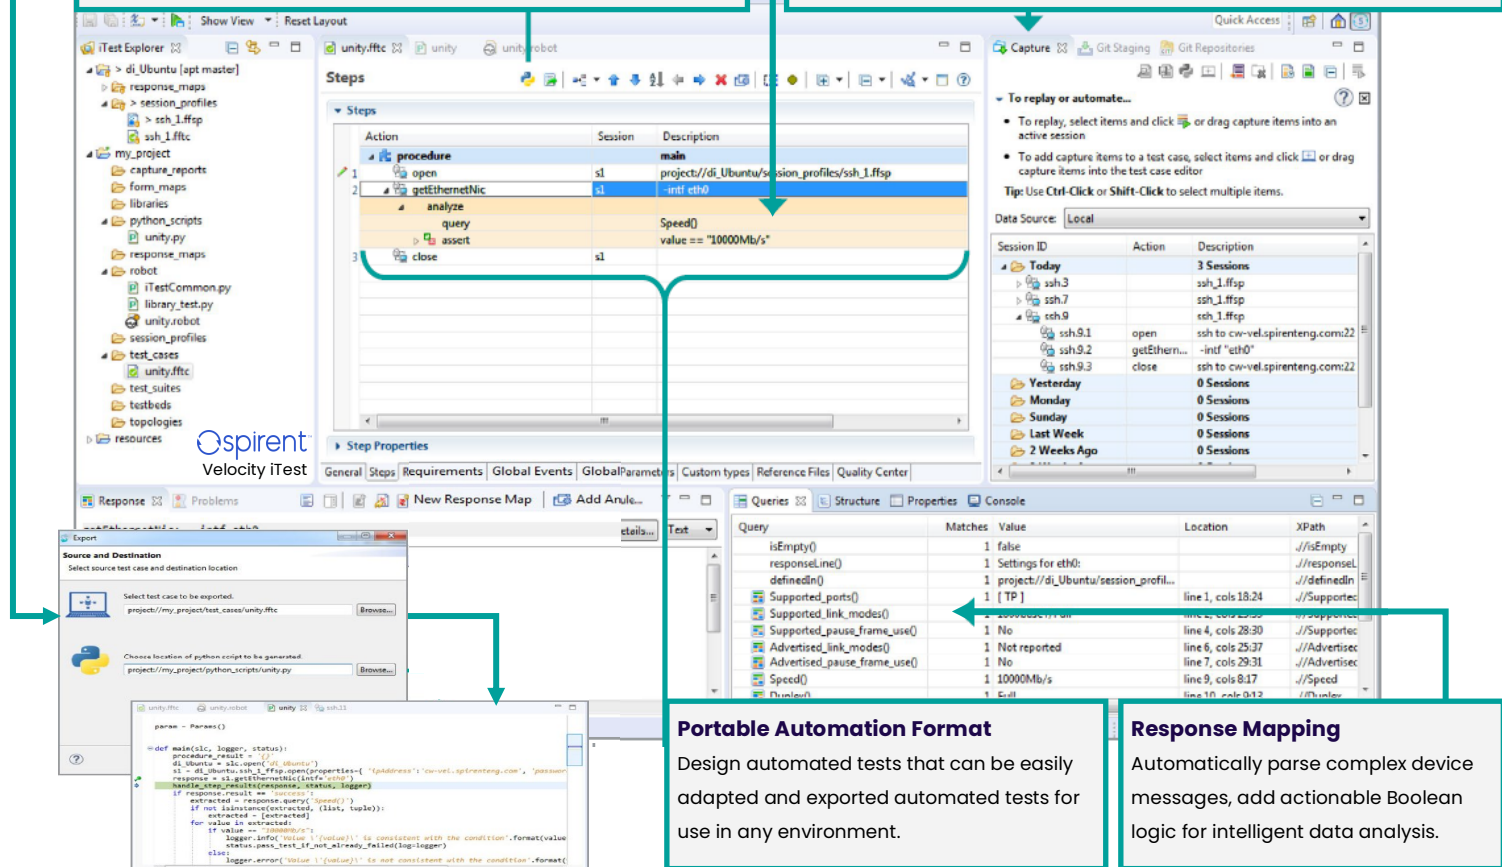

Rapidly create, reuse and publish Python and Robot framework automation content from a unified development environment.

## Live Interaction Development

Real-time development and troubleshooting of tests with context awareness of test devices, applications, or systems.

## Context-Aware Capture and Replay

Quickly develop automation scripts by capturing every action into a configurable sequence of manual testing. Replay and reconfigure with ease.

The screenshot displays the Spirent Velocity iTest IDE interface. On the left, a file explorer shows a project structure with folders like 'di\_Ubuntu', 'my\_project', and 'robot'. The main workspace is divided into several panes: 'Steps' (showing a sequence of actions like 'open', 'getEthernetNic', 'analyze', 'close'), 'Response' (showing a table of response data), 'Queries' (showing XPath queries and their matches), and 'Console' (showing log output). A 'Capture' pane on the right provides instructions for replaying or automating actions. A 'Portable Automation Format' pane shows a Python script snippet for testing network speed. A 'Response Mapping' pane shows how to parse response data using Boolean logic.

## Portable Automation Format

Design automated tests that can be easily adapted and exported automated tests for use in any environment.

## Response Mapping

Automatically parse complex device messages, add actionable Boolean logic for intelligent data analysis.

# Take Control, Achieve Results with APNT's CNTL Experts

Simplify the path to a modern, optimized network test lab with APNT's expert services designed to support your CNTL solution. We tailor solutions to your unique needs, ensuring rapid deployment for fast time-to-value. Our ongoing management maximizes efficiency and offloads routine lab tasks. Let our expertise unlock the full power of your CNTL investment, freeing your team to focus on innovation.

## Strategic Guidance

We lead or guide a CNTL strategy for your lab.

## Seamless Deployment

We ensure a seamless CNTL deployment.

## Ongoing Support

We are your partner committed to CNTL outcomes.
